

# latex test

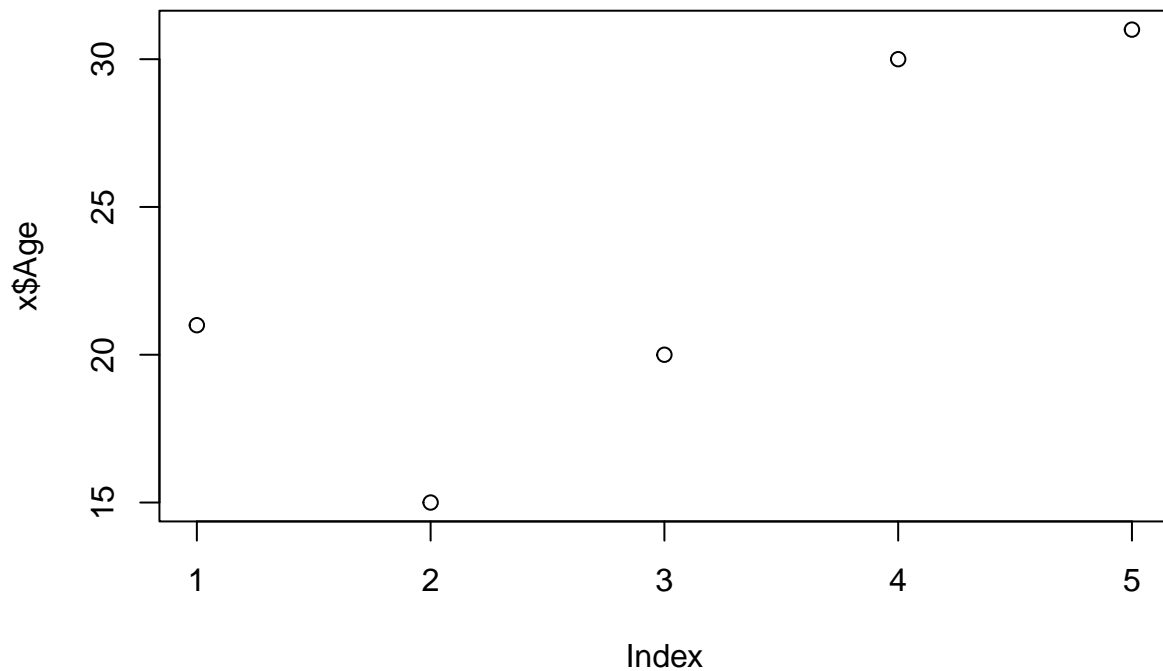

K. Labgold & P. Dunlap

August 29, 2019

To run this test, click “Knit” on the top left.

## Create Data

```
x <- data.frame("SN" = 1:5, "Age" = c(21,15, 20, 30, 31), "Name" = c("John","Dora", "Joe", "Denise", "J  
plot(x$Age)
```

## Types of tests

Let's test some other stuff.

```
#subset to only first obs (since characteristics only taken at baseline)  
x2 <- x%>%  
  mutate(random = SN + Age)
```
